Due to the continuing Adria shut down because of Covid restrictions, Their Imperial Majesties are requesting that no Chapters be reduced in status for the 2021 voting cycle.

CRB2. Charter Amendments.

CRB3. Consideration of Bids for Database and Website Improvement.

(Requires majority to approve.)

Chancery Note: No more than one bid will receive final approval. The estates may also reject both bids if they feel it appropriate. Both bids have been posted to the Files section of the Adrian Empire Facebook page. The Database Committee notice to the Estates and BoD is attached as Appendix A

To the Imperial Estates.

In keeping with with previously advised committee formation as well as the more currently noted minutes regarding collection and review of bids to update the database/website for the Adrian Empire, we present the following two bids. We feel that the bullet points as noted in the 2019 agenda have been met and ask to move forward to resolve the issues presented primarily to the Rolls and Steward Offices with the issues of the database current system.

Both bidders have had complete access to the database as well as the website and PHP programs. They are aware of the requirements noted in the original agenda item and need for future expansion to accommodate a wish list of the various offices involved in the website. Both bidders feel they are equally capable of providing for current and future Adrian Empire website needs.

Both bidders are aware that there is currently discussion on the DB committee. Both bidders have requested a level of anonymity until issues have been resolved. This is to avoid side conversations that may be detrimental to the project.

We do ask that the Imperial Estate Holders understand there is a difference between Database information and Website information. There is a "wish list" being formulated as to what website items are desired which is easy to extrapolate using code language. The database itself has been functioning since early 2000s but does need to become a web based application with some additional functionality and updating. This has been discussed with both bidders.

Bid 1 is from a company called Masheenist. Bid 2 is from a company called Element. Full name disclosure is available upon request.

It is believed that the author and sponsors of this agenda item are leaning toward the bid provided by Masheenist. While they are the new bidder, as Element has been in the bidding process since the origination of this conglomeration (3 years, duplicate bids), Masheenist is most Adria friendly, most responsive and more cost effective due to a prior member relationship and desire to "give back to the organization".

~MySQL is the code that was used & is available to anyone; not proprietary- Dame Lenora MySQL is a relational database management system based on SQL – Structured Query Language. The application is used for a wide range of purposes, including data warehousing, e-commerce, and logging applications. The most common use for mySQL however, is for the purpose of a web database.

Dame Katelyn stated that structure is addressed in bids & opined that DB/Integration has potential, need to someone to access & write; various reports available, just code is turned off from the info available currently.

APPENDIX C

Letters of Interest to serve on the Board of Directors

Greetings to the Empire

The last year has been an unprecedented one for all of us with challenges that no one expected to face. Born out of this adversity many have found new purpose to serve. With reopening of the Empire on the horizon I would be willing to offer myself for your consideration to serve the people of the Empire by representing the populace of region 2 on the Adrian Board of Directors. I have learned much over the last 20 years in the Adrian Empire from both my successes and mistakes alike and would offer this sum total of my experiences to benefit of the vox populi if they should find me worthy to speak for them.
